

UniXcape Voice Conference

UniXcape Voice Conference

is an instant audio conference or online meetings services wherever and whenever you want to have a meeting.

Web conferencing allows your organization to maximize its meeting effectiveness and productiveness.

Solution Overview

A lot of meetings? Need to discuss with your team and your clients at the same time? To make your work easier and productive, **UniXcape Voice Conference** is the best solution to provide a best quality services and more cost-effective.

UniXcape Voice Conferences supports Voice Conference Group license 1 up to 64 rooms. This solution allows participants to dial in and join conferences themselves instead of being dialed. All participants, whether internal, external, IP, TDM, mobile or corded, can dial into the UniXcape Conference.

UniXcape Voice Conference is designed for companies with a high demand for conferences and conference facilities. This is usually the case in development or administration departments or company headquarters. Typical branches include software manufacturers, media groups, banks, insurance companies or other large service providers. UniXcape Voice Conference can also be installed in training or consultancy facilities.

Productivity, Reachability, Cost Effective

Communication **never breakdown** with integrated presence and unlimited voice calls speed decision-making. Meeting with customers easily on their terms by easiest ways to get in touch with conferences.

Cost-Effective & Time Management: Spend more time and avoid travel costs because meetings can be held on site or via mobile phone using the company's existing telephone infrastructure. This eliminates journey times.

High Productivity: Quick decision or sharing can make through conference and never miss the meeting or other work.

Flexibility: Work more flexible, wherever or whenever you are whether be it at the office or home or travelling. All you need is a phone.

Security: Need security PIN number for accessing to the conference room.

Reachability: Easy to reach between client and teammate and also End-user support (customer services or helpdesk).

UniXcape Voice Conferences supports Voice Conference Group license 1 up to 64 rooms. This solution allows participants to dial in and join conferences themselves instead of being dialed. All participants, whether internal, external, IP, TDM, mobile or corded, can dial into the UniXcape Voice Conference. With web base interfaces supported, it can manage a member in the conference room and support group control function whether want to dismiss all, mute all or un-mute all by just click.

UniXcape Voice Conference can be used as conference rooms, where participants are notified of the meeting and they can dial in to take part. In this way, meetings can be held on site or via mobile phone using the company's existing telephone infrastructure. This eliminates journey times and the need for conference rooms and cuts out the often-unsuccessful manual dialing of participants normally associated with standard conferences.

UniXcape Voice Conference has a feature of an ad hoc conference. Ad hoc conference is started by an initiator and only the initiator of the conference can add people into the conference and also can configure the maximum number of participants for an ad hoc conference.

UniXcape Voice Conference is very secure. The participant that want to access the conference room need to key in the security PIN number. With this PIN number it will make sure no 'unwanted' participant can accessed.
